

WELLSFORD SCHOOL

31 January 2012

Dear Parents/Caregivers

Your child's classroom is in the process of setting up a Class Wiki. A wiki is similar to a web page. The purpose of a **CLASS WIKI** at Wellsford School is for students and teachers to share the learning that is happening in their classroom. By posting work on a WIKI they immediately have a wider audience and are a part of a digital global community. It is a great motivator for students. The Class Wiki is on the worldwide web and all posts are moderated by the class teacher and page content is editable only by the class teacher and the student.

As a parent you will be able to access the learning that is happening in your child's class and make comments. Class Wikis may have photographs and video and your child may feature in some of these. As per our school internet policy no personal information will be added to the wiki other than your child's first name and photos of activities/events your child has been involved in.

A link to your child's class wiki page can be found via our school website: www.wellsford.school.nz

These wiki's will be updated regularly so we hope you check them out often to see some of the wonderful work our children are doing.

If you have any concerns with this please contact your child's classroom teacher.

Dave Bradley
Principal
